

Arabian Gulf Oil ...General Tender Extension No. (MTC-18 /2017)

The Main Tender Committee of the Arabian Gulf Oil Company desires to release the following project: -

No.	MTC No.	Projects Title
1	MTC-18/2017	Study for water disposal and injection system for the Sarir oil field – Project No K-10

Description:

Arabian Gulf Oil Company (AGOCO) intends to carry out the study of the supply and installation of new facilities for the purpose of providing environment friendly and safe disposal of produced water in Sarir field and for water injection for reservoir pressure maintenance in Sarir C-North (GC-6 Area)

The project objective is to supply and install new facilities for:

- **Environmentally Safe Disposal of Produced Water in Sarir Field**

The objective being to eliminate surface disposal and ensure that all produced water is disposed of in a reliable and cost effective manner in disposal wells according to environmental codes and standards. This will initially require wide ranging options consideration looking at all combinations of treatment locations both local and centralised taking into account likely areas where disposal wells or other units could be located.

- **Water injection in Sarir C-North (GC-6 Area) for reservoir pressure maintenance**

Possible solutions are required to be identified and analysed on techno-economic grounds until a final proposed solution can be identified.

The consultant shall provide the most cost effective final design. The contractor/ consultant shall study various alternates/solutions and recommend the most viable, cost effective and environmentally suitable solution.

AGOCO invites proposals for carrying out site visit, data collection, Engineering study, basic design, preliminary engineering, preparation of EPPC bid documents, and proposal for construction supervisor/inspection(Optional), all required for satisfactory completion of the above project.
